

Weekly Brief (Oct 25 – Oct 29)

Summary:

Last week review: JCI's movement last week continue rally followed by net foreign buy. Globally, the release of the third-quarter financial report which was quite good became a positive catalyst for the index amid rising US Treasury Yield. Meanwhile, the number of US weekly jobless claims also decreased and was at the lowest level since the Covid-19 pandemic started. Domestically, the Board of Governors' Meeting (RDG) decided to hold the BI-7DRRR at 3.5% again, in line with maintaining the stability of the rupiah exchange rate and the financial system amid low inflation forecasts and efforts to support economic growth.

This week's outlook: Towards the end of October, the market's movements will tend to lack macroeconomic data sentiments. The focus of investors will be on the start of the Q3/2021 Financial Report release that started last week. Some banking issuers such as BBKA, BBTN, and ARTO have reported good performance growth; and investors expect this to trend to be followed by other issuers. Globally, energy crises have started to recede after the Chinese government decided to interfere the hike of coal price. Market participants will observe the development with global commodity prices, as a decline may potentially burden the energy and mining stocks.

JCI Index	: 6,643.73 (+0.2%)
Foreign Flow	: Net buy of IDR3.2 trillion (vs. last week's net buy of IDR4.7 trillion)
USD/IDR	: 14,123 (+0.34%)
